Today's video is about

Bulk replacing family
parameters using Dynamo

Bulk replace parameters

Today's process

- Get a bunch of families in a directory
  - Some with family parameters
  - Some with shared parameters
- Use Excel to replace them with shared parameters

More thorough vs my old video…

Today we will be using...

Software platforms

- Autodesk Revit
- Dynamo for Revit (built into Revit)

Third party add-ins

- Crumple for Dynamo

Assumed knowledge

Not all necessary, but it will help!

Platform fundamentals

- Autodesk Revit
- Dynamo for Revit

Programming fundamentals

- Python fundamentals
- Revit API fundamentals

Feel free to check out my other videos if the topic is a bit challenging.

Work your way up to it. Programming and BIM requires fundamentals first, then specifics afterwards.

Don't rush!

Let's dive in!

And make our own solution!

Am I talking too fast?
Slow me down if you like!
